Professional Summary

Aspiring AI/ML professional with strong fundamentals in machine learning, deep learning, and software engineering. Passionate about applying artificial intelligence to solve real-world problems. Experienced with developing, optimizing, and deploying ML models using Python and modern AI frameworks. Self-motivated, collaborative, and dedicated to continuous learning.

Skills

- **Programming Languages :** Python, C, C++, HTML, CSS, MySQL, Java, JavaScript
- **ML/DL Frameworks :** Scikit-learn, TensorFlow, OpenCV
- **Data Analysis :** NumPy, Pandas, Data Preprocessing, Feature Engineering, Data Visualization
- **Tools :** Jupyter Notebook, Git, GitHub, VS Code, Google Colab, Anaconda, TensorBoard
- **Areas of Expertise :** Machine Learning, Deep Learning, Data Preprocessing, Computer Vision, NLP, Data Analysis
- **Core Concepts :** Machine Learning, Deep Learning, Computer Vision, NLP, Model Evaluation, Hyperparameter Tuning.

Experience

- Developed and trained machine learning models using Scikit-learn and TensorFlow, improving prediction accuracy through data preprocessing and feature engineering.
- Built and optimized a CNN-based deep learning model for image classification, enhancing performance using augmentation and tuning techniques.
- Designed an AI-based crop disease prediction system, enabling accurate detection and real-time decision support.

Education

- **Higher Secondary Education:** Shiva Academy Senior Secondary School, Karauli (Raj.) *2020-2022*
- **B.Tech - CSE:** Jaypee University of Engineering and Technology, Guna *2023-2027*
- **CGPA:** 7.1

Projects

- **End-to-End House Price Prediction System :** Built a complete machine learning pipeline including data preprocessing, feature engineering, and model training using Linear Regression and Random Forest.
- **Crop Disease Prediction using Deep Learning :** Built a CNN model for plant disease detection from real-time and web-sourced images, delivering accurate classification and actionable treatment insights.
- **Sanjeevni :** Hospital management system using React.js, Vite, and APIs blood donation booking, geolocation-based hospital search, and music therapy integration with secure, role-based access.
- **Smart Home location based Selector :** Built a recommendation model using city datasets to rank locations based on factors such as pollution index, suitability score, schools, and hospitality.

Certifications

- **Infosys C/C++ Foundation Course:** Infosys Springboard (Feb 2024)
- **Advanced HTML and CSS:** Infosys Springboard (Sept 2024)
- **HACKTRON:** University 12 hrs offline Hackathon (May 2025)
- **Treasure Hunt:** Game event of VRARMR club (May 2025)

Extra-Curricular and Leadership

- **Coordinator:** VRARMR Club, Rospinot Club, Bitwise Coding Club
- **TACHYON (Tech Fest):** Organizing team and VRARMR Club representative.
- **Hackathon Certificate:** HACKTRON, University : Competed in coding challenges
- **JYC DRAMA Wing:** Performer and Coordinator
